

## Pathways for organic material<sup>1</sup> application to land

Certified biodegradable organic material		Uncertified digestate	Compost	Biosolids	Landfill
Group A (requires pasteurisation)	Group B (does not require pasteurisation)	Material which does not meet the criteria for certification as a digestate biofertilizer.	Dry woody material not suitable for AD recycling	Digestate from municipal waste water treatment facilities	Organic material not able to be applied to land
<p>Kerbside food waste collections incl FOGO</p> <p>Food manufacturing that is NOT solely plant based.</p> <p>Primary processing eg approved abattoirs</p> <p>Post consumer foodstuffs:</p> <ul style="list-style-type: none"> <li>• Food approved for human consumption ie spoiled</li> <li>• Restaurant, café, catering waste.</li> </ul> <p>(incl milk, milk products, egg products)</p> <p>Fats, oils, grease, greasetrap</p> <p>Paunch grass</p> <p>DAF ex abattoir, dairy frm or factory</p> <p>Animal manure (biofertiliser can be used on farms from which the manure is not sourced).</p>	<p>Agricultural break crops</p> <p>Fruit, orchard/packhouse waste</p> <p>Vegetable, paddockwaste incl stems and roots</p> <p>Forage grass, pasture</p> <p>Food manufacturing that is solely plant based.</p> <p>Brewery waste</p> <p>Vineyard – grape marc</p> <p>Animal manure (biofertiliser must be used on same farm from which the manure is sourced)</p>	<p>Requires a resource consent which specifies the conditions which must be met when the material is applied to land.</p>	<p>Material which meets the Composting standard.</p> <p>May require a resource consent which specifies the conditions which must be met when the material is applied to land.</p>	<p>Material which meets the criteria of the Biosolid Guidelines</p> <p>May require a resource consent which specifies the conditions which must be met when the material is applied to land.</p>	<p>Organic material of unknown source</p> <p>Material containing chemicals, heavy metals, plastics.</p> <p>Material which does not meet the criteria of the biosolids Guidelines, Compost standard, or criteria for certification as a digestate biofertilizer.</p> <p>Contaminated organic material.</p>

<sup>1</sup> Excludes biomass from forestry and wood processing operations.
